

MGHAMER

Independent esports coverage. Arabic and English.

mgghamer.com | Gaming stories with a MENA perspective

THE PUBLICATION

Mgghamer covers competitive games and the Arab esports scene, with news, analysis and practical guides in English and Arabic. Core coverage includes CS2, League of Legends, Dota 2, VALORANT and GTA.

Reporting experience

Attiah covered EWC 2024 and 2025 while working for another platform and has explored events across the region. This is personal reporting experience, not a claim of past Mgghamer coverage or official EWC partnership.

Ways to work together

Content production: bilingual articles, written interviews and recaps for your channels.

Sponsored coverage: clearly labelled articles, event previews and coverage series.

Event reporting: planning, access-dependent interviews and post-event stories.

Example package: bilingual event coverage

1 event preview + 2 interviews (subject to access) + 1 event recap, each with English and Arabic written coverage. Includes agreed deadlines, revision scope, usage rights and a report of available measured results.

How we work

Fees are quoted to scope. Travel, accommodation and additional production are agreed separately. Paid placements are labelled Sponsored; editorial independence is preserved. No guaranteed reach, sales or positive reviews.

Audience measurement

Visitor measurement has recently been introduced. A verified reporting baseline is being built. Available results are shared with the reporting period, metric definitions and tracking limitations; no unverified audience claims.
